We Identify and S.T.O.P. Your Noise Problem

Super K Cork and Rubber Pads

The all-rubber Super W pad is usually the best pad for isolating vibration. However, many contractors are used to the cork and rubber composite pad and are hesitant to change. We have a new cork and rubber pad, the Super K, that is a great improvement over what's out there now. A lower duro rubber, glued to both sides of a cork core, gives the equipment a quieter ride. The modular 2' x 2' design with a thin membrane between allows the contractor to easily cut and separate the Super K pad with a box cutter or utility knife for just the size he needs.

SK LOAD RATINGS (per Square)

Type	Size (inches)	Load per 2" x 2" square (lbs)	Rated Defl. (in)
SK	18 x 18 x 3/4	200	.07
