We Identify and S.T.O.P. Your Noise Problem

ACOUSTI-CURTAIN™

Sound Absorbing Drapery

- **High Quality Construction**
- **PFR or IFR Face Layer and Lining Fabrics**
- **Excellent Sound Absorption**
- **Wool Core – Absorbs, Filters & Breaks Down Harmful VOC's from the Air**
- **Reflects Thermal Energy**
- **Custom Designed for Any Application**
- **Variety of Fabric Options**

The Acousti-Curtain is a revolutionary new product. **Sound absorbing** drapery primarily designed to **absorb more sound than standard decorative curtains**. These curtains are made with **sound absorbing** material and are ideally used where control of acoustic reflection off of glass and ambient light control are required. These acoustical curtains feature a core material of naturally fire resistant wool fabric that is sandwiched between a decorative fabric and a blackout liner. The wool core material has also been shown to continuously filter harmful VOC (Volatile Organic Compounds) from the air. The Acousti-Curtain product will also reflect thermal energy and block light when drawn across a window or doorway. The Acousti-Curtain is custom designed to fit and match your interior design specifications. Please call for a quote.

NOTE: *The Acousti-Curtain does not block sound transmission and should not be used as a noise barrier.*

Applications:

- Home theaters and other residential spaces
- Commercial spaces
- Restaurants
- Schools
- Churches
- Retail spaces
- Office spaces

Sizes & Options:

- Acousti-Curtains are custom designed for your application.
- Standard drapes feature large grommets (1.5" ID) for hanging.
- Other mounting options may be available upon request.
- Accessories (tie backs, fringe) are available upon request.

Colors:

- Wide variety of face layer and lining fabrics available. *Please refer to the color chart on our website:*
