RSIC-CWB

Resilient Sound Isolation Clips – Chase Wall Brace

The Sound of Silence

RSIC-CWB Resilient Sound Isolation Clip

The RSIC-CWB™ has been used for several different acoustic needs. The most common use for this clip is to decouple two framed walls from each other. Some of the other uses are separating Brick or CMU walls from a framed wall to help ensure the two walls are isolated from each other. This is done by installing the RSIC-CWB™ into the mortar joints while the Brick or CMU wall is under construction.
