

Echo Eliminator™ & LEED™

The US Green Building Council announced the creation of the first voluntary national green building standard for developing high-performance, sustainable buildings – **LEED (Leadership in Energy and Environmental Design) Green Building Rating System**.

Echo Eliminator™ Natural Cotton Fiber Insulation can contribute to earning several LEED credits throughout the program. Listed below are the categories and prerequisites where Echo Eliminator™ may contribute.

Energy & Atmosphere	Comments
Prerequisite 2 - Minimum Energy Performance	Echo Eliminator™ facilitates compliance with ASHRAE 90.1-1999.
Credit 1 - Optimize Energy Performance	
Materials & Resources	
Credit 4 - Recycled Content	Echo Eliminator™ contains over 80% Post-Industrial recycled content.
Credit 6 - Rapidly Renewable Resources	Echo Eliminator™ utilizes cotton as one of its main material sources.
Indoor Environmental Air Quality	
Prerequisite 1 - Minimum IAQ Performance	Echo Eliminator™ contains no harmful irritants or chemicals that can pose VOC concerns.
Credit 4 - Low Emitting Materials	
Innovation In Design	
Credit 1 - LEED design credits	Echo Eliminator™ can contribute to innovative design credits that involve a plan to utilize innovative material choices throughout the project.
