We Identify and **S.T.O.P.** Your Noise Problems

Contour Melamine Foam Acoustical Ceiling Tiles

Hello Mike at Acoustical Surfaces:

I am writing to thank you very much for processing our order for acoustical tiles. First of all, we appreciate the personal touch and professional advice you gave. You took the time to get to know our facility, our expectations and the desired results from our studios. With your assessment, we went with your recommendations and specifications, and the result is a world-class independent TV studio right here in San Francisco. The difference in the audio quality between our old one and our new one is quite dramatic. Your company's professionalism in painting the acoustical tiles to match our décor added a customized touch and helps us in our presentation. I was additionally impressed with the prompt turnaround time.

Now we are going into remodeling mode of the old studio to bring it up to code, a standard you helped us define for ourselves. In essence, you've become an important member of our rebuilding team here, even though you're a few hundred miles away. Again, we appreciate your help in all this.

Respectfully yours,

Ray Santiago
President, Beyond Pix Communications
